

DRY-RUN GUIDE | try.py

Source: Python\1st_Belt\try.py

CORE BEHAVIOR

Classifies one character as uppercase, lowercase, digit, or special using membership tests.

REPRESENTATIVE INPUT

'G'

STEP TRACE

'G' belongs to the uppercase alphabet string, so the first branch runs.

EXPECTED OUTPUT / RETURN

'Upper case'

ACTUAL SOURCE EXCERPT

Verbatim excerpt from Python\1st_Belt\try.py; line numbers refer to the original file.
No source was modified.

001 | # Question: Solve the input-processing challenge implemented in this program.

002 | # Add your solution here.

003 |

004 | while True:

005 | text = input("Enter the Character: ")

006 |

007 | def char_palindrome(text):

008 | reversed_text = "".join(reversed(text))

009 |

010 | if reversed_text == text:

011 | print("Character is a palindrome")

012 | return True

013 | else:

014 | print("Character is not a palindrome")

015 | return False

016 |

017 | if not char_palindrome(text):

018 | break

DRY-RUN NOTE

Values are representative. For function-only modules the guide uses an illustrative direct call and explains its return; quirks/errors describe actual behavior.
