

DRY-RUN GUIDE | prefix2.py  
Source: Python\2nd\_Belt\prefix2.py

#### CORE BEHAVIOR

Reads a string and candidate prefix, uses `startswith()` to test the prefix, and prints Yes/No.

#### REPRESENTATIVE INPUT

`s='helloWorld', p='hello'.`

#### STEP TRACE

`s.startswith(p)` evaluates True, so print Yes.

#### EXPECTED OUTPUT / RETURN

`'Yes'`

#### ACTUAL SOURCE EXCERPT

Verbatim excerpt; line numbers refer to the original source, which was not modified.

```
001 | # Question: Compute the prefix values for the given sequence.
```

```
002 | # Add your solution here.
```

```
003 |
```

```
004 | s = input().strip()
```

```
005 | p = input().strip()
```

```
006 |
```

```
007 | # Check if s starts with the prefix p
```

```
008 | if s.startswith(p):
```

```
009 |     print("Yes")
```

```
010 | else:
```

```
011 |     print("No")
```

```
012 |
```

#### DRY-RUN NOTE

Trace describes actual source behavior, including errors where applicable.
