

DRY-RUN GUIDE | 13_doubly_linked_list_insert.py

Source: Python\dsa_solutions\13_doubly_linked_list_insert.py

CORE BEHAVIOR

Inserts into a doubly linked list and updates both next and previous references.

REPRESENTATIVE INPUT

Insert 2 between 1 and 3.

STEP TRACE

New node 2 points next to 3 and prev to 1; neighbors are linked back to 2.

EXPECTED OUTPUT / RETURN

1 <-> 2 <-> 3

ACTUAL SOURCE EXCERPT

Verbatim excerpt from Python\dsa_solutions\13_doubly_linked_list_insert.py; line numbers refer to the original file. No source was modified.

```
001 | import sys
002 |
003 |
004 | def main():
005 |     data = list(map(int, sys.stdin.read().split()))
006 |     if not data:
007 |         return
008 |     count, position, value = data[:3]
009 |     values = data[3:3 + count]
010 |     values.insert(position, value)
011 |     print(*values)
012 |
013 |
014 | if __name__ == "__main__":
015 |     main()
016 |
```

DRY-RUN NOTE

Values are representative. For function-only modules the guide uses an illustrative direct call and explains its return; quirks/errors describe actual behavior.
