

DRY-RUN GUIDE | 03_string_input.cpp
Source: cpp\1st_belt\03_string_input.cpp

CORE BEHAVIOR

Reads the full input line with `getline` (spaces and punctuation included), then prints it after a fixed label.

REPRESENTATIVE INPUT / CALL

Input line: 'C++ practice!'

STEP TRACE

`getline` stores the whole line in `n`; stream insertion writes the label and then `n` without adding a newline.

EXPECTED OUTPUT / RETURN

'You entered: C++ practice!'

ACTUAL SOURCE EXCERPT

Verbatim lines from the source; long lines wrap. Source files were not modified.

```
001 | /*
002 | Question:
003 | Read a string from the input and print it in the following form:
004 |
005 | You entered: <input string>
006 |
007 | The input string may contain uppercase letters, lowercase letters,
008 | digits, spaces, and special characters.
009 | */
010 |
011 | #include <iostream>
012 | #include <string>
013 | using namespace std;
014 |
015 | int main() {
016 |     string n;
017 |     getline(cin, n);
018 |
019 |     cout << "You entered: " << n;
020 |
021 |     return 0;
022 | }
023 |
```
