

DRY-RUN GUIDE | particular_no.js

Source: javascript\1st_belt\particular_no.js

CORE BEHAVIOR

The apparent intention is to print the third input, but input is a string and is called as if it were a function ('input(3)'). This raises TypeError in JavaScript.

REPRESENTATIVE INPUT / CALL

Input: '10 20 30'.

STEP TRACE

readFileSync().trim() returns a string; evaluating input(3) attempts to call that string.

EXPECTED OUTPUT / RETURN

No value is printed; TypeError ('input is not a function').

ACTUAL SOURCE EXCERPT

Verbatim lines from the source; long lines wrap. Source files were not modified.

```
001 | // Question: Find the required number based on the given condition.
```

```
002 | // Add your solution here.
```

```
003 |
```

```
004 | const fs = require('fs')
```

```
005 | const input = fs.readFileSync(0, 'utf-8').trim()
```

```
006 | console.log(input(3))
```

```
007 | // 3 if we wanna print 3rd input and n for nth input
```

```
