

DRY-RUN GUIDE | vowels.js

Source: javascript\1st_belt\vowels.js

CORE BEHAVIOR

Despite the filename/comment about counting vowels, it tests whether both the first and last input characters are vowels and prints a label. Empty input has undefined endpoints and fails the membership checks.

REPRESENTATIVE INPUT / CALL

Input: 'area'.

STEP TRACE

First char 'a' and last char 'a' are both in the vowel string.

EXPECTED OUTPUT / RETURN

'Vowel'

ACTUAL SOURCE EXCERPT

Verbatim lines from the source; long lines wrap. Source files were not modified.

```
001 | // Question: Count the number of vowels in the given string.
002 | // Add your solution here.
003 |
004 | const fs = require('fs');
005 | const a = fs.readFileSync(0, 'utf-8').trim();
006 |
007 | // Define a string containing all lowercase and uppercase vowels
008 | const vowels = 'aeiouAEIOU';
009 |
010 | // Get the first and last characters of the input string
011 | const firstChar = a[0];
012 | const lastChar = a[a.length - 1];
013 |
014 | // Check if both characters are vowels
015 | if (vowels.includes(firstChar) && vowels.includes(lastChar)) {
016 |     console.log('Vowel');
017 | } else {
018 |     console.log('Not Vowel');
019 | }
020 |
```
