

DRY-RUN GUIDE | random.py

Source: Python\1st_Belt\random.py

CORE BEHAVIOR

Four sequence exercises follow, but the first block contains an invalid assignment target ('i//2=2'). Python cannot parse the module, so none of the exercises executes.

REPRESENTATIVE INPUT

Any input (e.g. 4) is irrelevant until parsing succeeds.

STEP TRACE

The parser stops at source line 9, 'i//2=2'; floor-division cannot be an assignment target. Execution never reaches an input prompt.

EXPECTED OUTPUT / RETURN

No program output; running/importing raises SyntaxError. The source is unchanged.

ACTUAL SOURCE EXCERPT

Verbatim source lines:

```
001 | # Question: Generate or process a random number as required by the task.
002 | # Add your solution here.
003 |
004 | x = int(input())
005 | i = 0
006 | while i < x and x%2==0:
007 |     i += 1
008 |     print(i, end=" ")
009 |     i//2=2
010 |
011 | x = int(input())
012 | i = 2
013 |
014 | while i <= x:
015 |     print(i, end=" ")
016 |     i += 2
017 |
018 | x = int(input())
019 |
020 | if x % 2 == 0:
021 |     for i in range(1, x + 1):
022 |         print(i, end=" ")
023 |
024 | x = int(input())
025 | i = 0
026 |
027 | if x % 2 == 0:
028 |     while i < x:
029 |         i += 1
030 |         print(i, end=" ")
031 | else:
032 |     print("x is odd")
```
