

DRY-RUN GUIDE | same.py

Source: Python\3rd_Belt\Matrix\same.py

CORE BEHAVIOR

Reads matrix dimensions and rows, then prints each row in the same order.

REPRESENTATIVE INPUT

2x3: '1 2 3' and '4 5 6'.

STEP TRACE

Rows are appended to a list; print each row with space-separated values.

EXPECTED OUTPUT / RETURN

'1 2 3' then '4 5 6'

ACTUAL SOURCE EXCERPT

Verbatim excerpt from Python\3rd_Belt\Matrix\same.py; line numbers refer to the original file. No source was modified.

```
001 | # Question: Read an n x m matrix and print it exactly as it is entered.
```

```
002 | # Add your solution here.
```

```
003 |
```

```
004 | # Read the number of rows (n) and columns (m)
```

```
005 | n, m = map(int, input().split())
```

```
006 |
```

```
007 | # Read each row of the matrix
```

```
008 | matrix = []
```

```
009 | for _ in range(n):
```

```
010 |     row = list(map(int, input().split()))
```

```
011 |     matrix.append(row)
```

```
012 |
```

```
013 | # Print the matrix row by row, with elements separated by a space
```

```
014 | for row in matrix:
```

```
015 |     print(*row)
```

```
016 |
```

DRY-RUN NOTE

Values are representative. For function-only modules the guide uses an illustrative direct call and explains its return; quirks/errors describe actual behavior.
