

DRY-RUN GUIDE | reversed_matrix.py

Source: Python\3rd_Belt for practice\Matrix\reversed_matrix.py

CORE BEHAVIOR

Prints matrix rows in reverse order while preserving the order within each row.

REPRESENTATIVE INPUT

Rows '1 2 3' and '4 5 6'.

STEP TRACE

matrix[::-1] visits the second row, then the first.

EXPECTED OUTPUT / RETURN

'4 5 6' then '1 2 3'

ACTUAL SOURCE EXCERPT

Verbatim excerpt from Python\3rd_Belt for practice\Matrix\reversed_matrix.py; line numbers refer to the original file. No source was modified.

```
001 | # Question: Read a matrix and print it in reverse row order.
```

```
002 | # Add your solution here.
```

```
003 |
```

```
004 | def print_reversed_matrix(rows, cols, matrix):
```

```
005 |     for row in matrix[::-1]:
```

```
006 |         print(" ".join(map(str, row)))
```

```
007 |
```

```
008 | def main():
```

```
009 |     rows, cols = map(int, input().split())
```

```
010 |     matrix = [list(map(int, input().split())) for _ in range(rows)]
```

```
011 |
```

```
012 |     print_reversed_matrix(rows, cols, matrix)
```

```
013 |
```

```
014 | if __name__ == "__main__":
```

```
015 |     main()
```

```
016 |
```

DRY-RUN NOTE

Values are representative. For function-only modules the guide uses an illustrative direct call and explains its return; quirks/errors describe actual behavior.
