

DRY-RUN GUIDE | selection_sort.py

Source: Python\4th_belt\selection_sort.py

CORE BEHAVIOR

Orders values using the comparisons, swaps, insertion, partition, or merges shown in this file.

REPRESENTATIVE INPUT

[4,1,3,2].

STEP TRACE

Each pass/partition places values nearer their final positions; completed sequence is nondecreasing.

EXPECTED OUTPUT / RETURN

1 2 3 4 (check source for exact formatting).

ACTUAL SOURCE EXCERPT

Verbatim excerpt from Python\4th_belt\selection_sort.py; line numbers refer to the original file. No source was modified.

```
001 | # Question: Sort the array using the selection sort algorithm.
```

```
002 | # Add your solution here.
```

```
003 |
```

```
004 | mylist = [64, 34, 25, 12, 22, 11, 90, 5]
```

```
005 |
```

```
006 | n = len(mylist)
```

```
007 | for i in range(n):
```

```
008 |     min_index = i
```

```
009 |     for j in range(i+1, n):
```

```
010 |         if mylist[j] < mylist[min_index]:
```

```
011 |             min_index = j
```

```
012 |     mylist[i], mylist[min_index] = mylist[min_index], mylist[i]
```

```
013 |
```

```
014 | print(mylist)
```

DRY-RUN NOTE

Values are representative. For function-only modules the guide uses an illustrative direct call and explains its return; quirks/errors describe actual behavior.
