

DRY-RUN GUIDE | aircraft.py
Source: ca-2\psup\aircraft.py

CORE BEHAVIOR

This runs as a top-level script. Input reads: `input().strip(); input().strip(); input().strip(); input().strip()`. Output statements include: `print(f"Initial queue: {' '.join(arr)}"); print(f"After adding {arrival}: {' '.join(arr)}"); print(f"After removing {remove_name}: {' '.join(arr)}")`.

REPRESENTATIVE INPUT

Supply the fields in order: `input().strip() | input().strip() | input().strip() | input().strip()`.

STEP TRACE

Bind each input to its variable, follow the taken condition and loop updates, then evaluate the final print expression.

EXPECTED OUTPUT / RETURN

Evaluate the listed print expression(s) for the assumed values: `print(f"Initial queue: {' '.join(arr)}"); print(f"After adding {arrival}: {' '.join(arr)}"); print(f"After removing {remove_name}: {' '.join(arr)}")`. Prompts may also appear.

ACTUAL SOURCE EXCERPT

Verbatim excerpt from ca-2\psup\aircraft.py; line numbers refer to the original file. No source was modified.

```
001 | aircraft1 = input().strip()
002 | aircraft2 = input().strip()
003 | aircraft3 = input().strip()
004 | aircraft4 = input().strip()
005 | aircraft5 = input().strip()
006 |
007 | arr = [aircraft1, aircraft2, aircraft3, aircraft4, aircraft5]
008 |
009 | print(f"Initial queue: {' '.join(arr)}")
010 |
011 | arrival = input().strip()
012 |
013 | arr.append(arrival)
014 |
015 | print(f"After adding {arrival}: {' '.join(arr)}")
016 |
017 | remove_name = input().strip()
018 |
019 | if remove_name in arr:
020 |     arr.remove(remove_name)
021 |
022 | print(f"After removing {remove_name}: {' '.join(arr)}")
023 |
024 | count_name = input().strip()
025 |
026 | count = arr.count(count_name)
027 |
028 | print(f"Occurrences of {count_name}: {count}")
029 |
030 | print(f"First: {arr[0]}, Last: {arr[-1]}")
```

```
031 |  
032 | print(f"Total aircraft: {len(arr)}")  
033 |
```

DRY-RUN NOTE

Values are representative. For function-only modules the guide uses an illustrative direct call and explains its return; quirks/errors describe actual behavior.
