

DRY-RUN GUIDE | 02_hello_world.js

Source: javascript\1st_belt\02_hello_world.js

CORE BEHAVIOR

Reads all standard input as UTF-8, trims the outside whitespace, and prints the line after 'You entered:'.

REPRESENTATIVE INPUT / CALL

Input: 'ProgrammingIsFun!'.

STEP TRACE

trim() removes surrounding whitespace; template literal concatenates the label and the retained text.

EXPECTED OUTPUT / RETURN

'You entered: ProgrammingIsFun!'

ACTUAL SOURCE EXCERPT

Verbatim lines from the source; long lines wrap. Source files were not modified.

```
001 | // Question:
002 | // Write instructions so the computer greets us with "Hello World!".
003 | // Example input: Hello World! -> Output: Hello World!
004 |
005 | process.stdin.on("data", function (data) {
006 |     const input = data.toString().trim();
007 |     console.log(input);
008 | });
009 |
```
