

DRY-RUN GUIDE | 03_echo_input.js

Source: javascript\1st_belt\03_echo_input.js

CORE BEHAVIOR

Registers a stdin data-event callback, converts each received chunk to text, trims it, and echoes it. Behavior is chunk-based rather than explicitly waiting for a complete line.

REPRESENTATIVE INPUT / CALL

One stdin chunk containing 'Hello World!\n'.

STEP TRACE

Callback receives the chunk; toString and trim produce 'Hello World!'; console.log prints it.

EXPECTED OUTPUT / RETURN

'Hello World!'

ACTUAL SOURCE EXCERPT

Verbatim lines from the source; long lines wrap. Source files were not modified.

```
001 | // Question:
002 | // Read a line of input and print it in this exact format:
003 | // You entered: <input>
004 | // Example: Input: ProgrammingIsFun! -> Output: You entered: ProgrammingIsFun!
005 |
006 | const fs = require("fs");
007 | const input = fs.readFileSync(0, "utf8").trim();
008 | console.log('You entered: ${input}');
009 |
```
