

DRY-RUN GUIDE | check_list_in_assecending_order.js

Source: javascript\2nd_belt\check_list_in_assecending_order.js

CORE BEHAVIOR

Reads N and N integers, then checks whether any adjacent pair decreases. Equal adjacent values are permitted.

REPRESENTATIVE INPUT / CALL

Input: '5 1 2 2 7 9'.

STEP TRACE

The comparisons $1 \leq 2$, $2 \leq 2$, $2 \leq 7$, $7 \leq 9$ all pass; isAscending remains true.

EXPECTED OUTPUT / RETURN

'Yes'

ACTUAL SOURCE EXCERPT

Verbatim lines from the source; long lines wrap. Source files were not modified.

```
001 | // Question: Check whether the list is sorted in ascending order.
```

```
002 | // Add your solution here.
```

```
003 |
```

```
004 | const fs = require("fs");
```

```
005 | const input = fs.readFileSync(0, "utf-8").trim().split(/\s+/);
```

```
006 |
```

```
007 | let index = 0;
```

```
008 | const n = parseInt(input[index++]);
```

```
009 | let arr = [];
```

```
010 |
```

```
011 | for (let i = 0; i < n; i++) {
```

```
012 |     arr.push(parseInt(input[index++]));
```

```
013 | }
```

```
014 |
```

```
015 | // Check if each element is less than or equal to the next element
```

```
016 | let isAscending = true;
```

```
017 | for (let i = 0; i < n - 1; i++) {
